Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 1, the phrase "for example or such as" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Obradovich (6,275,231).

Regarding applicant claim 1, Obradovich discloses a prioritization method of information provides e.g. plug-ins, especially for the coordinated powertrain control for a motor vehicle, wherein a list having requests or plug-ins is sorted according to the degree of the rising or falling priority, the sorted list is processed sequentially, beginning with the requester or plug-in having the highest priority, the processing of the list is broken off as soon as a requester or a plug-in includes a request command, in order to

select this request command (col. 14, lines 25-40, "priority of menu selections, access by other users to the hardware and software of the vehicle... operation control subsystem causes display to show information about installed features, accessories, options, etc."). Although Obradovich does not specifically use the term "plug-ins" he does teach on subsystems that could be added or removed as well as other features that would work equally well as plug-ins. It would have been obvious to one of ordinary skill in the art to apply the known technique of updating priority of the subsystem of Obradovich with the plug-in of the application to yield predictable results.
